

Marine Food Chain Questions

Use the following questions to guide your learning about the food chain. You must include this information in your Act it Out! Performance.

1. How do living organisms survive in the ocean?
2. What is a producer? Give examples of producers in the ocean.
3. What is a primary consumer? Give examples of primary consumers in the ocean.
4. What is a secondary consumer? Give examples of secondary consumers in the ocean.
5. What is a decomposer? Give examples of decomposers in the ocean.
6. Which animals are the predators and which animals are the prey in the ocean?
7. Describe and diagram with labels some examples of food chains in the ocean.
8. Describe what would happen to each member of this food chain if one member became extinct.
